Fkremariam Fentahun

GOLANG BACKEND DEVELOPER | CYBERSECURITY SPECIALIST

Address: Addis Ababa , Ethiopia
Phone: +251 900 914 832 | Email: fkremariamfentahun66@gmail.com
Portfolio:https://portfolio-naod-ethiop.vercel.app/
LinkedIn: linkedin.com/in/fkremariam-fentahun b9a902390| GitHub: github.com/naodEthiop

SUMMARY

Backend developer with specialization in Golang and system security design. Proficient in the development of scalable backend systems, developer tools, and security auditing tools. Committed to high-performance systems, automation, and reinforcing system security through hands-on solutions.

EDUCATION

Addis ababa Science and Technology University
Undergraduate Student

Relevant Coursework: Emerging Technology, Physics, and Technical Communication.

SKILLS

Languages: Go (Golang), JavaScript, Structured Query Language (SQL)

Frameworks: Gin, Echo, Fiber, Next.js

Tools & Databases: PostgreSQL, Docker, Git, Burp Suite, Nmap

Specializations: Backend Architecture, CLI Tooling, Security Auditing, Automation

WORK EXPERIENCE

Cyber Security Intern - Information Network Security Administration (INSA)
2025

- helped implement vulnerability mitigation strategies and security audits.
- Assisted in developing security initiatives at the national level.
- Helped in risk assessment and security measures for critical backend systems.

STEM Aviation Innovation Participant - Boeing STEM Program
2024

- Contributed to technical innovation projects in the area of system integrity.
- Executed precision engineering tasks to enhance backend systems.

STEM Instructor – Gondar STEM Center
2022-2023

- I have given hands-on STEM education to high school students with hands-on lab activities.
- I have guided my students on various robotics, programming, and embedded systems projects.

PROJECTS

- **Lalibela CLI**

Go CLI tool for project scaffolding with clean architecture.

- **Multiplayer Bingo Game**

Real-time multiplayer game with Go backend, Next.js frontend, and WebSocket.

- **Web Recon Tool**

Automated web reconnaissance for faster, accurate audits.

- **Duplicate Analyzer**

Detects duplicate records in large datasets using Go and Python.

- **Robot Forklift**

Autonomous robot with precise navigation; national competition winner.

- **Exam Control System**

Automated system for secure exams and result generation;
Built for the national science fair.

- **Secure Microservice Framework (In Progress)**

Personal Golang project for secure, scalable backend microservices.
